## SUMMARY

Computer Science student at KMIT (8.95 GPA) with a strong foundation in Artificial Intelligence and Full-Stack Development. Experienced in building high-accuracy Deep Learning models using TensorFlow and Keras, including a 93% accurate CNN for plant disease detection. Passionate about applying AI and cloud architecture to solve complex business problems at scale.

## EDUCATION

**Keshav Memorial Institute of Technology, Hyderabad, India** Bachelor of Technology in Computer Science | Sept 2023 – Present

- GPA: 8.95 / 10
- Relevant Coursework: Data Structures & Algorithms, Machine Learning, Database Management Systems, Cloud Computing.

**Narayana Junior College, Hyderabad, India** 12th Grade | Aug 2021 – May 2023

- Percentage: 98.8%

## SKILLS SUMMARY

- AI/ML:** Python (Advanced), TensorFlow, Keras, CNN, Computer Vision (OpenCV), NumPy, Pandas
- Data & Analytics:** SQL, Power BI, Excel, MySQL, Data Visualization
- Development:** MERN Stack (MongoDB, Express, React, Node.js), Flask, C++, Java
- Tools:** Git, VS Code, Jupyter Notebook, IntelliJ IDEA
- Certifications:** AWS Solutions Architecture, Data Visualization (Tata), DevOps Trends (Accenture)

## PROJECTS

**AI-Based Plant Disease Detection System** Sept 2024 – Dec 2024

- Developed a deep learning system using **Python** and **TensorFlow** to detect plant diseases with **93% accuracy**.
- Implemented **VGG16-based transfer learning** and data augmentation to improve model robustness across diverse datasets.
- Built a real-time web interface using **Flask** and **OpenCV** allowing users to upload images for instant diagnosis.
- Tools Used: Python, TensorFlow, Keras, OpenCV, Flask

**Joyverse – Mental Wellness Platform** Feb 2025 – May 2025

- Engineered a full-stack platform for child therapy using the **MERN stack**, focusing on real-time emotional monitoring.
- Integrated **face-api.js** to perform real-time facial emotion detection, enhancing session interactivity for therapists.
- Streamlined clinical workflows by implementing secure user authentication and automated emotion-based reporting.
- Tools Used: Node.js, Express, MongoDB, face-api.js, JavaScript, HTML/CSS

## CERTIFICATES

**AWS APAC Solutions Architecture (Virtual Experience)** Mar 2025

- Designed scalable cloud architectures using **AWS Elastic Beanstalk**, aligning technical solutions with business growth.

**Tata Data Visualisation: Business Insights (Job Simulation)** Mar 2025

- Created business-ready dashboards in **Power BI** to support strategic decision-making through data storytelling.

**Accenture UK Developer & Technology Experience** Jul 2025

- Researched **Agile vs. Waterfall** methodologies and designed algorithm logic for debugging solutions in **Python**.
